INDUSTRIAL IE ENGINEERING

Indices, 1978 Volume 10

Microfilm copies of articles are available from University Microfilms International, 300 North Seeb Road, Ann Arbor, MI 48106.

Subjects (coded) and titles

0100 Costs

0102 Cost controls

Using quality cost analysis for management improvement; L. Blank, J. Solorzano; February, p. 46.

0103 Cost estimating

Computer charting cuts gamble in cost estimates; C. R. Asfahl; August, p. 18.

IE's and cost estimating; P. F. Ostwald, P. J. Toole; February, p. 40.

0105 Productivity

Improved productivity needs leadership—YOURS!; J. L. Riggs; November, p. 45.

Productivity—an international contest; J. H. Kehlbeck; January, p. 18.

Productivity means more than "push wheelbarrow faster"; J. L. Hamlin; April, p. 42.

0200 Employee relations

0300 Engineering economics

0302 Equipment replacement

Now replace equipment on actual cost basis; C. B. Estes, A. Jalali-Yazdi; November, p. 34.

Replacement analysis in your pocket; B. T. Sperling; October, p. 28.

0303 Investment analysis

Checking risks in capital investments; B. W. Taylor, III, K. R. Davis; December, p. 32.

0400 Facilities planning, design

0401 Environment protection

Basics of wire-supported flexible duct; February, p. 44.

0405 Plant layout analysis

Models substantiate court claims; P. A. Cipriano; September, p. 56.

Save space, save money; E. V. Natarajan; December, p. 21.

0500 Functional operations

Get those drawings out, right now!; J. C. DeVore; December, p. 25.

When the plane is grounded, paint it; C. B. Craft; May, p. 30.

0501 Assembly

Hot-melts for assembly operations; J. Alyea; January, p. 36.

0502 Clerical

WP center speeds legal work; March, p. 26.

0503 Computer operation, software

Comparing commercially available CPM/PERT computer programs; C. A. Smith, P. Mahler; April, p. 37.

Conference puts CAD/CAM in focus; K. J. Fritz; October, p. 38.

0600 Human engineering

0603 Ergonomics

Workplaces for short people, tall people, or both; A. Roozbazar; July, p. 18.

0604 Learning

Fit data to a learning curve using a programmable calculator; M. E. Richerson; January, p. 23.

0606 Personnel scheduling

How large a staff for a service organization; M. B. Khan; August, p. 32.

0608 Safety and health

Carrying the safety training load—tips for all managers; J. S. Milutinovich, A. V. Phatak; November, p. 24.

Job enrichment cause of increased accidents; J. T. Saari, J. Lahtela; October, p. 41.

0609 Training

New device increases trainee's skill; R. J. Craig, J. A. Overfelt, W. C. Turner; July, p. 40.

Tips on audio-visual training aids; J. C. DeVore; February, p. 28.

0700 Incentive plans

0705 General

50-interval chart helps in calculating incentive rates; J. R. Boehringer; June, p. 31.

0800 Industrial engineering

0801 AIIE

AIIE Annual Report: 1977-78; August, p. 33.

American Institute of Industrial Engineers, Incorporated/1978-79; June, p. 36.

Institute Officers: 1978-79; March, p. 32.

Productivity Engineering Show; May, p. 45.

Record-making crowd at Toronto; J. C. DeVore; July, p. 33.

Remember November in KC?; January, p. 24.

Toronto-from castles to computers; J. Harwood; April, p. 40.

Your Headquarters Staff; March, p. 36.

0804 Education

Productivity improvement: a time for industry/university action; J. Grant; April, p. 48.

0806 IE management

Auditing the IE function; C. D. Williams, Jr.; February, p. 32.

0807 Report presentation

Handling idea a winner? Prove it!; E. C. Braun; September, p. 46.

Tell the boss—in his terms; R. P. Lutz; July, p. 22.

0808 General

IE's have roots, too; J. T. Black; May, p. 22.

In memoriam: David B. Porter; M. Fein; November, p. 33.

Learn from the "super-achievers"; R. V. Elicano; October, p. 30.

Lillian Moller Gilbreth (1878-1972); May, p. 26.

My wife, the industrial engineer; W. D. Engelke; June, p. 24.

0900 Industries

0906 Others

Shipbuilding workshop another AIIE first; J. C. DeVore; April, p. 46.

1000 Management

1002 Communications

Controlled English avoids multi-translations; J. Kirkman; February, p. 38.

1004 Information systems

Information systems: a long way from wall carvings to CRT's; April, p. 24.

Preparing the growing manufacturer for computer operations; C. R. White, G. E. Holmes, K. L. Jones; March, p. 28.

The office of the future headed for extinction?; D. C. Vadnais; June, p. 44.

1006 Organization

Operations control—the organized way to improve productivity; J. C. Werner; July, p. 26.

Save time in drawing organization charts; R. C. Peterson, J. Tavassol; p. 28.

Industrial Engineering 1978

1007 Project management
Practical plan for modeling; T. G. Ray, J. M. Pruett; November, p. 38.

1008 Controls
A "yardstick" for measuring productivity; W. T. Stewart; February, p. 34.

1100 Material handling

1105 Dispatching, scheduling
Moving freight: IE's keep things trucking; D. B. Brown; October, p. 34.

1106 Industrial trucks
Tips for picking lift truck attachments; J. D. Smiley; September, p. 42.

1107 Methods and systems design
High-speed deliveries improve high-volume production; T. B. Long, Jr.; November, p. 42.

1111 Storage, warehousing
Cold storage holds raw materials ready for processing; June, p. 42.
Fast start-up for new warehouse; January, p. 32.

1114 General
Better ways for material handling; J. C. DeVore; September, p. 31.
When to use automatic barfeeding; March, p. 38.

1200 Methods engineering

1202 Computer control
Millions of pills are identical under computer control; June, p. 34.

1203 Energy conservation
Computerized energy management—its time has come; R. S. Howell; December, p. 22.
Computer prevents energy consumption nightmares; J. A. Glenz; July, p. 38.
Energy audits—what's happening?; J. C. DeVore; June, p. 32.
Get the most from your energy audit; R. L. Gourley; September, p. 50.
IE's manage energy at Walt Disney World; R. D. Doering, R. C. Mitchell, H. W. Persons; October, p. 23.
Industrial energy management—first steps are easy; J. M. Shirley, W. C. Turner; May, p. 34.

1204 Identification systems
Automatic label making simplifies identification; L. E. Durst; May, p. 32.

1212 Waste collection, disposal
Holland fights pollution; May, p. 42.

1213 Work design, methods improvement
Microcircuits need people protection; J. J. Kanarek; December, p. 30.
What IE's can do in a motel; January, p. 34.

1214 Work analysis techniques
Comparing productive activities at different times; D. S. Allen, II, R. F. Corn; March, p. 40.
Take another look at memo-motion; P. A. Walsh; May, p. 44.

1300 Quantitative methods

1400 Production and inventory control

1404 Materials management
Care and feeding of MRP; D. A. Devarajan; August, p. 22.

1405 Production control
Keep tabs on production flow, literally; W. W. Phelps; November, p. 37.

1407 Production scheduling
Shop control system far cry from job jar approach; E. D. Olsen; December, p. 16.

1500 Quality control

1600 Work measurement

1608 Standards development
A small company's guide to computerized shop standards; R. P. Kiddney; September, p. 54.
Developing standards by computer; R. F. Weaver, J. J. Kollmar, E. A. Boepple, Jr.; January, p. 26.

1611 General
Activity measurement program promotes productivity; D. P. Mazzolla, J. D. Kauffman; June, p. 26.
Are grads trained in work measurement?; J. M. Daschbach, T. P. Cullinane; November, p. 40.
Is more measurement better?; G. Nadler; March, p. 20.

1700 Data processing systems design

1978 Spring Annual Conference

Proceedings of the 29th Annual Conference and Productivity Engineering Show Toronto, Canada, May 23-26, 1978

Subjects (coded) and titles

0100 Costs

0103 Cost estimating

Parametric Costing and Institutionalized Inefficiency; L. J. Dumas; p. 156.

0104 Cost reduction programs

Use of Learning Curves to Set Goals and Monitor Progress in Cost Reduction Programs; W. J. Richardson; p. 235.

0105 Productivity

Action for Productivity Improvement: Role of the IE; G. H. Kuper; p. 204.

A Participative Approach to Productivity Measurement in a Manufacturing Firm; W. T. Stewart; p. 569.

A Productivity Self Improvement Program: Fifty Questions for a Changing Age; R. B. Footlik; p. 137.

Improving Deep Mine Productivity Through Effective Industrial Engineering; E. H. Newton, Jr.; p. 279.

Measuring Productivity Changes: A Case Study; B. Ferguson; p. 173.

Productivity Improvement: An Organized Effort; J. Hamlin; p. 223.

Productivity Improvement Through Comparative Analysis; I. Bernolak; p. 185.

Productivity Perspectives: Considerations for Economic Analyses; J. L. Riggs; p. 50.

0200 Employee relations
Worker Productivity—International Report; K. Goshi; p. 192.

0300 Engineering economics

0303 Investment analysis
Implied Accuracy Through Casual Precision; J. V. Kilbane; p. 559.
A Multi-Goal Approach to Capital Equipment Investment; P. R. Odom, R. E. Shannon; p. 312.

0400 Facilities planning, design

0405 Plant layout analysis
An Interactive Graphics System for Warehouse Layouts; D. F. Gibson, G. A. Sattoriva; p. 121.

0410 General
New Tools for Computer Aided Facilities Planning and Design; R. J. Heisterberg; p. 107.

0500 Functional operations

0600 Human engineering

0601 Behavioral science
Measurement of Behavioral Interactions in Industrial Human Relations; R. A. Brown, W. F. Sowder; p. 510.
Proxemics—The Spatial Interaction of Man With Man; J. J. Mariotti; p. 572.

0603 Ergonomics
A Survey of Ergonomics Applications in Sewn Products and Textile Operations; J. L. Smith, L. A. Smith; p. 500.
Industrial Engineering Applications to Promote Increased Productivity of the Disabled Worker; D. R. Smith, A. Stewart, R. L. Biddy; p. 67.
Information Quality in Multivariate Process Control; K. R. Laughery, Jr., C. G. Drury; p. 83.
The Exception Proves the Need—for Ergonomics; D. F. Jones, p. 91.

0607 Personnel scheduling
Human Channel Capacity Measures—A Valuable Personnel and Selection Tool?; D. Cousins, R. R. Safford; p. 76.

0609 Training
One Company's Approach to the Training of Industrial Engineering Supervisors; D. J. Rose; p. 583.
Predicting Productivity Review Needs During the Learning of Manual Repetitive Tasks; J. B. Nelson; p. 452.

0610 Sociological factors
Changing Conditions for Worker Productivity in Europe; A. C. Hubert; p. 197.

0700 Incentive plans

0703 Special types
Motivation for Rapid Start-Up of New Facilities; L. F. Fellin; p. 411.

0705 General
Incentives for Economical Purchasing of Prescription Drugs: A Dynamic Model; B. Murphy, H. Elayat, N. D. Prabhakar; p. 533.
Making Wage Incentives Work in a Union Shop: A Case Study; R. D. Nelson; p. 457.

0800 Industrial engineering

0806 IE management
Auditing the Total Industrial Engineering Function; C. D. Williams, Jr.; p. 449.
Restructuring the Industrial Engineering Department Objectives; J. D. McCormick; p. 579.

0900 Industries

0902 Government
Improving Urban Government Through Applied Industrial Engineering; P. G. Haynes, J. S. Niles; p. 549.
Overregulation of Business: Economic Paralysis; W. H. Shaker, J. L. Bevirt; p. 240.

0903 Health care and other services
How to Improve Productivity in the Hospital; G. P. Stone; p. 520.
Length of Hospital Stay by Day of Admission: A Statistical Analysis; H. Elayat, N. D. Prabhakar, B. Murphy; p. 528.

0905 Transportation, distribution
Determining Transportation Fleet Requirements; C. B. Estes; p. 427.

0906 Others
Industrial Engineering and Sewn Products; B. Bernholtz; p. 407.

1000 Management
A Yen For Improvement or How to Succeed in Business by Really Trying; R. H. Stearns; p. 213.
Government Subsidies to Industries: A Dilemma for the Industrial Engineer; N. Finger; p. 151.
The Departmental Mini Computer Concept as an Aid to Administrative Productivity; S. Liberty; p. 249.

1004 Information systems
Distributed vs Non-Distributed Data Processing in a Multi-Plant Manufacturing Environment; M. J. Seiden; p. 29.
Increased Police Productivity Through Feedback; D. E. Clapp; p. 22.
Productivity Measures for Administrative Computing and Information Services; W. T. Morris; p. 495.

1007 Project management
Management Risk Aversion in Engineering Projects; R. E. Shannon; p. 3.

1008 Controls
Corporate Systems Fail to Detect Millions in Industrial Losses; J. H. Hoffman; p. 443.

1100 Material handling

1110 Receiving, shipping
Computerized Distribution of Soft Goods; M. Leranbaum; p. 404.

1111 Storage, warehousing
Computer Aided Warehouse Layout: A Case Study; R. J. Graves, J. I. Richardson, J. A. White; p. 143.

1114 General
The Eton 2000 Production and Work Place System; I. Arnold, J. Feldman; p. 399.
The Evolution of Material Handling in the Apparel Industry; M. N. Steinberg, H. Furman; p. 395.

1200 Methods engineering
Minimizing Energy Consumption in the EDM Process; J. E. Biegel; p. 261.
Work Place Engineering in the Apparel Industry; P. Felder; p. 389.
Work Place Engineering in the Apparel Industry; S. S. Schipper; p. 387.

1202 Computer control
American-Steel Industry Process Control Trends; W. F. Monteith; p. 417.

1203 Energy conservation
An Engineering Economic Analysis of Solar Space and Water Heating; M. H. Presley, W. C. Turner; p. 37.
Applying Industrial Engineering to Mining Energy Conservation; W. Yanisiew; p. 284.
Design and Management of a Data Base for State Wide Energy Conversion and Conservation in Public Building; D. L. Gochenour, Jr., E. N. Caldwell, R. W. Plummer; p. 15.
Energy Management Programs—Industrial Engineers Improve Energy Productivity; J. M. Shirley, R. Gourley; p. 229.
New Facilities Planning for Energy Management—An Overview; W. C. Turner, R. E. Webb; p. 127.

1204 Indentification systems
Group Technology—Overview and Critique of Coding Techniques; E. W. Zimmers, Jr., S. Sharma, A. F. Gould; p. 266.

1211 Value analysis, engineering
Value Engineering Revisited; T. J. Snodgrass; p. 478.

1212 Waste collection, disposal
A Practical Case Study on Productivity Improvement in the Urban

Services Sector; M. R. Wilhelm, D. J. Hagerty; p. 164.

Municipal Solid Waste Processing: A Look at Subsystems Economics; P. Gheresus, S. K. Adams, J. C. Even, Jr.; p. 55.

1213 Work design, methods improvement

An Industrial Engineering Dilemma: Simplified Versus Enlarged Jobs; G. Salvendy; p. 464.

1300 Quantitative methods

1301 Mathematical models

Canada's Petroleum Emergency Allocation Model; M. H. Honarvar, W. E. Gauthier; p. 304.

1302 Networks

Network Modeling in Production Planning; J. R. Evans; p. 297.

1303 Programming: linear, nonlinear

A Linear Programming Model for Labor Planning; J. A. Thompson; p. 289.

1400 Production and inventory control

Production Simulation: Increase Production Productivity; D. Waliszewski; p. 327.

The Route Scheduler: A Macro Planning Model for the Analysis of Train Interference and Scheduling; L. Dube, P. N. Belshaw; p. 436.

Toward A Comprehensive Network Cost Model; P. M. Wolfe, E. B. Cochran, W. J. Thompson; p. 334.

1401 Distribution systems

Computerized Warehouse Labor Control Program; J. Richmond; p. 381.

1402 Forecasting

An Approach to Electricity Price Forecasting; A. K. Mallik, L. T. Moore; p. 45.

1404 Materials management

An Economic Alternative to Material Requirements Planning Micro/Mini Computer Applications; R. McGee, R. P. Sadowski; p. 342.

1405 Production control

EDP Data Manipulation as Related to Work Measurement; J. Fenkell; p. 392.

1407 Production scheduling

A Scheduling System for Radiology Procedures; G. P. DiChiara, R. A. Harris; p. 539.

Comparison of Heuristic and Optimal Solutions for an Order Preserving Sequencing Problem; S. Lakshminarayan, R. Lakshmanan, R. L. Papineau, R. Rochette; p. 346.

1500 Quality control

1501 Inspection

Fault Information, Display Density and Inspector Performance; D. S. Kochhar, J. Woode; p. 90.

Inspection Cost vs Risk Cost: An Algorithm for Analyzing Inspection-Related Cost Tradeoffs in the Aerospace Industry; R. A. Bascom, J. L. Miller, III; p. 563.

1502 Quality control

A Report on the Status of Quality Assurance Practices of Quebec Based Manufacturers; E. Menipaz; p. 353.

Empirical Prediction of Yields and Required Times in Electronic Testing; E. M. Malstrom, R. A. McNeely; p. 321.

1503 Reliability

Availability Analysis Designed for Farm Machinery; W. J. Kolarik, K. E. Case; p. 366.

Optimization in Designing for Reliability Including Cost of Failure; K. C. Kapur, H. L. Harris, L. R. Lamberson; p. 375.

Reliability, Availability and Maintainability Program in a Metal Processing Facility; B. P. Singh; p. 358.

1600 Work measurement

1604 Pace rating

The Worker's Perception of a Change in Work Rate; R. K. Schutz, T. H. Campbell; p. 95.

1605 Predetermined time systems

MOST Systems for Improved Industrial Engineering Productivity; K. B. Zandin; p. 486.

1608 Standards development

Establishing Time Standards by Parameters; M. Fein; p. 470.

1978 Fall Conference

Proceedings of the 1978 Fall Industrial Engineering Conference

Atlanta, GA, December 4-6, 1978

Subject (coded) and titles

0100 Costs

A Simple Coding System for Computer Aided Quoting and Costing; M.O. Hoverman; p. 321.

0102 Cost controls

A General Hospital Model for Cost Containment; H. I. Zagor; p. 335.

You Should be Controlling White Collar Costs; B. DiSylvester, R. T. Young; p. 22.

0104 Cost reduction programs

The Five Week Cost Reduction Identification Program; R. L. Howe; p. 325.

0105 Productivity

Finding Opportunities for Improving Productivity; R. L. Howe; p. 330.

The "Best" Method is Not Good Enough—Or How to be Total-Productivity Oriented; C. E. Geisel, G. Nadler; p. 3.

0200 Employee relations

0201 Arbitration

An Arbitration Presentation—Box Seat at a Labor Management Dispute; W. C. Cooling; p. 300.

The Role of the Industrial Engineer in Productivity Arbitrations; J. L. Rigassio; p. 331.

0300 Engineering economics

0304 General

A Survey of Multiattribute Utility; R. L. Keeney; p. 147.

Differential Rates of Inflations; S. Baum; p. 154.

Economic Aspects of a 150 KW Solar Powered Pumping Project Probabilistic Cash Flow; S. J. Hawley, J. M. Trzeciak; p. 344.

Life Cycle Costs—Old Hat to Industrial Engineers; S. G. Gilbreath, III; p. 109.

Measuring the Economic Productivity of Prospective Investment Projects; R. I. Reul; p. 123.

The Future Wealth Concept as a Guide to Profitability; R. Swalm, J. L. Lopez-Leautaud; p. 132.

The Minimum Revenue Requirements Discipline (MRRD); P. H. Jeynes; p. 113.

0400 Facilities planning, design

0404 Plant design, construction

Warehouse Planning; T. P. Cullinane, J. A. Tompkins; p. 239.

0405 Plant layout analysis

Efficient Optimization Techniques for the Allocation of Warehouse Space in a Hierarchy of Inventory Systems; G. R. Deakin; p. 338.

1978 Fall Conference

0410 General

Transfer Line Design and Analysis—An Overview; J. A. Buzacott, L. E. Hanifin; p. 277.

0500 Functional operations

0503 Computer operations

Measurement of Computer User Satisfaction; S. W. Pearson, J. E. Bailey; p. 219.

0504 Maintenance, plant engineering

Equipment Maintainability Evaluation Using Work-Measurement Techniques; L. R. Doyon, R. F. Perry; p. 341.

0505 Purchasing

Finding the Economic Buy-Ahead Quantity (EBAQ) for Optimum Buying With Price Increases; C. L. Hohenstein; p. 329.

0600 Human engineering

0609 Training

Microprocessor Trained Time Study Analysts; P. M. Wolfe, E. J. Ferguson, W. C. Turner; p. 343.

0700 Incentive plans

0705 General

A Discussion of Incentive Pay Systems and Their Application in Check Encoding; M. A. Kilpatrick; p. 166.

0800 Industrial engineering

0900 Industries

0901 Financial

Automation and Productivity in Commercial Banking—What it Means; D. R. Riddle; p. 163.

Industrial and Systems Engineering Personnel, Practices and Effectiveness in Large Banks; E. L. Heard, J. E. Wheat; p. 177.

1000 Management

Implementing a Performance Management System; S. Lowery, D. Schafer; p. 203.

Strategy for Office Automation in Universities—Special Problems and Prospects; L. R. Alley; p. 334.

1003 Decision making

Reflections of Decision Analysis Practice; D. W. North; p. 142.

1004 Information systems

A Management Oriented Energy Information System to Facilitate Decision Making; J. M. Garber; p. 317.

Comparison of Alternative Systems for a Tanning Industry in Oklahoma; A. Goicoechea; p. 336.

Productivity Gains from the Use of Word Processing Concepts; M. G. Clarke; p. 270.

Real Time Data Gathering System for Returns Processing; J. W. Freeman, H. Nanda; p. 185.

The Application of Word Processing in a Banking Environment; R. Staley, T. de Sostoa; p. 173.

The Microcomputer in its Business Role—A Word-Processing Development; H. C. Kinne; p. 265.

Why A Data Base? Which One?; L. Lane; p. 322.

1006 Organization

A Method to Improve Response Time for Police Cruiser Personnel; C. Jain; p. 323.

1100 Material handling

1111 Storage, warehousing

Automatic Warehousing Systems; W. H. Hausman; p. 287.

Computer Aided Warehousing; R. J. Heisterberg; p. 245.

Warehousing—The Physical Manifestation of Marketing Policy; E. R. Sims; p. 339.

1114 General

Material Handling and Energy Management; R. E. Webb; p. 91.

1200 Methods engineering

Group Technology Demands New Answers to Old Questions; R. J. Levulis; p. 327.

1201 Automation, mechanization

Maximizing the Opportunities Offered by Mechanization—A Prescription for Survival; M. Gaetan; p. 307.

1202 Computer control

The Use of Computerized Control Systems in Energy Management; W. J. O'Mara; p. 66.

1203 Energy conservation

Energy Audits; L. G. Spielvogel; p. 76.

Estimating Energy Management Cost Savings; J. M. Shirley; p. 62.

How to Perform an Energy Audit; W. J. Kennedy, Jr.; p. 56.

Implementing Energy Management Programs; W. C. Turner; p. 51.

Oklahoma Industry's Experience in Waste Heat Recovery; R. E. Webb; p. 318.

Waste Heat Recovery—The Stelco Experience; J. C. Cochrane; p. 73.

1212 Waste collection, disposal

Economics and Policy Aspects of Waste Management at the Front-End of the Nuclear Fuel Cycle; R. E. Turley, G. M. Sandquist; p. 97.

1300 Quantitative methods

1301 Mathematical models

An Analysis of Wisconsin Traffic Fatalities—Modeling Approach; D. J. Schaub, T. Chang; p. 324.

1304 Regression analysis

A Multiple Regression Model for Energy Budgeting in the Plant Environment: A Case Study; T. F. Daugherty; p. 316.

1305 Simulation/games

Application of the Upfar Simulation System on Feasibility Studies of Energy Development Projects; M. S. Eid, H. K. Eldin; p. 319.

1400 Production and inventory control

Minicomputer Applications in Production & Inventory Control; J. P. Kelleher; p. 193.

1401 Distribution systems

Minicomputers in the Retail Pharmacy—Operations and Economics; R. E. Quirk; p. 259.

1402 Forecasting

A Run-Based Adaptive Exponential Forecasting Technique; J. D. Dennis; p. 328.

1407 Production scheduling

Analysis of Limited Resource Network Scheduling Heuristics; J. H. Ristroph; C. E. Ashley; p. 333.

Capacity Planning in a Multi-Plant Interdependent Manufacturing Business; J. H. Tondreau; p. 231.

Goal Programming as a Heuristic for Scheduling Two Stage Continuous Flowshops; S. L. Narasimhan, T. R. Richmond, p. 332.

1500 Quality control

1600 Work measurement

An Interactive Computer System and Work Measurement . . . An Innovative Approach; K. M. Varisco, J. M. Pruett; p. 342.

1605 Predetermined time systems

Comparison of Predetermined Time Systems (PTS); C. L. Brisley; p. 13.

WOCOM and Quick Work-Factor: The State-of-the-Art in Predetermined Time Systems; R. F. Weaver, E. A. Boepple, Jr.; p. 31.

1611 General

Industrial Work Standards and Productivity; I. Otis; p. 291.

1700 Data processing systems design

1705 General

Systems Analysis of a Real-Time Multiprocessor Minicomputer System; W. H. Lenharth, G. D. Smith, R. W. Corell; p. 315.
